

2022 ANNUAL APPEAL

Men comprise 80% of all suicide fatalities. Our nonprofit's single mission and focus is to end this silent crisis drastically. Our approach is to provide free and targeted mentoring and legal assistance in seven high-stressor areas pinpointed by our research with 7,000+ men globally.

Our focus for 2023-2024 is on providing comprehensive mental, emotional, educational, strategic, and legal assistance in all areas pertaining to child custody, child support, and visitation, specifically for fathers.

feministsformen.org

A child custody battle can cost between \$10K-\$40+K per case. Most fathers can't afford that; thus, they're forced to downgrade themselves from a present father to a monthly visitor. This has negative ramifications on child development, self-confidence, sense of security, and father's mental well-being.

\$15,000 provides case-specific legal advice and representation for a father; making sure his children have a healthy and present father, not a monthly visitor.

\$10,000 provides state-specific legal strategy and education for 10 fathers.

\$5,000 provides professional mental and emotional support and mentoring for a father through every step of his child custody battle.

thank you

Saving families one household at a time
